SUMMARY

Finance graduate student with hands-on experience across the full finance cycle, from bookkeeping, reconciliation, and budget tracking to forecasting, valuation, and investment analysis. Builds financial models in Excel and Python and turns the numbers into clear, decision-ready recommendations. Seeking full-time finance roles.

EDUCATION

DePaul University, Kellstadt Graduate School of Business | Master of Science, Finance (STEM) Jan 2025 – Dec 2026

GPA: 3.6/4.0 | $12,800 Merit Scholarship

Jai Hind College, University of Mumbai | Bachelor of Commerce, Financial Markets Aug 2020 – Jan 2023

WORK EXPERIENCE

Wild City | Funding Strategy Intern | New York, NY (Remote) May 2026 – Sep 2026

- Supported financial planning and forecasting across marketing and media business lines, analyzing revenue and expense trends to prepare briefings for senior leadership.
- Prepared structured financial reports and ad-hoc analyses, turning findings into clear deliverables for corporate and executive stakeholders.

Aarth Associates | Junior Portfolio & Investment Analyst | Nagpur, India Jul 2024 – Dec 2024

- Reviewed financial statements and performance data across 50+ active opportunities, turning findings into structured analyses that supported investment decisions.
- Built repeatable financial planning and reporting workflows, reducing analytical errors by 10–15% through systematic process improvement.
- Prepared quarterly financial performance analyses and variance summaries for senior leadership review.

AONE Sales | Office & Finance Manager May 2023 – May 2024

- Analyzed operating performance and expense structure for a $6M+ revenue company, developing data-driven recommendations that improved profitability.
- Built Excel-based Annual Operating Plans, scenario analyses, and KPI dashboards supporting 5-year long-range planning.
- Processed vendor payments, customer invoices, and employee payroll; built a receivables and payables tracking system for 30 to 60 day payment terms.
- Recorded journal entries, accruals, and account reconciliations in SAP and Tally, and handled tax and GST compliance filings.

Placement Experts USA | Financial Project Analyst (Full-time) | St. Louis, MO (Remote) Oct 2021 – Oct 2022

- Tracked project spending against budgets, monitoring variances and reconciling vendor invoices against purchase orders and supporting documentation.
- Supported cash flow forecasting based on stakeholder input and project timelines, working independently across time zones in a fully remote environment.

SKILLS

Finance & Accounting: Financial modeling, DCF/LBO, comparable company analysis, budgeting and forecasting, variance analysis, scenario modeling, account reconciliation, accruals, AP/AR

Software & Tools: Excel (Pivot Tables, VLOOKUP, Solver), Python (pandas, NumPy, statsmodels), SQL, Power BI, Tableau, Bloomberg Terminal, Capital IQ, SAP, Tally, Salesforce

CERTIFICATIONS & LEADERSHIP

Certifications: SIE Exam (In Progress); Bloomberg Market Concepts (Nov 2025); Goldman Sachs Operations Job Simulation (Jan 2026); JPMorgan Chase Investment Banking Job Simulation (Jan 2026)
